

October Message Avoid Spooky Surprises Online

October is the scariest month of the year when all the monsters come out to play, but people online are even scarier.

- Avoid clicking on competition pop-ups because they could be scammers trying to steal your identity.
- Don't click on inappropriate links sent to you via email.
- Don't talk to strangers online no matter who they are or what they say.

- If someone sends you a friend request on Facebook, Roblox etc don't accept it unless you know the person that sent you it.

Remember Techno's commercial rule.
Never open any pop-up windows or marketing emails. Always tell an adult.
